

**A tailored course for Guidance Teachers
where you learn how to inspire pupils to
consider a career in engineering**

WHAT

'Engineering a Career' is a qualification, perfect for guidance teachers, that highlights how any subject can be linked to engineering. It encourages pupils to see the opportunity of an engineering career linked to their favourite subjects and for teachers to be able to better advise pupils about subject choices and career pathways.

HOW

The course takes a minimum of 24 hours to complete over 18 weeks and we are currently taking pre-registrations for the 2024/2025 Academic Year.

A tailored course for Guidance Teachers where you learn how to inspire pupils to consider a career in engineering

WHY

- Learn about the diverse range of engineering careers.
- Learn how to identify all subjects and interests in the curriculum that can lead to engineering careers.
- Identify, engage and interview 'subject' engineers to better understand their career path and their school experiences.
