

EXPLORING THE WORLD OF HOMEBUILDING

Teacher Briefing Sheet

This educational resource provides an interactive and engaging introduction to house building, designed for **secondary school** or **further education** students. It includes:

- 1. Introduction to House Building** – Covers key concepts in construction, sustainability and careers/pathways into the industry
- 2. Virtual Site & Office Tour** – Gives students a first-hand look at how construction projects are managed.
- 3. House design activity** – utilising creativity and the application of mathematics. Please note you can contact Julie.Baker@keepmoat.com for support with this activity.
- 4. Cross-curricular links** – helping students to understand real world applications of their learning.
- 5. Linking to:** Design & Technology, Mathematics, Science, Geography, ICT & Computing, Art & Design, Business & Economics and PHSE.
